WHO WE ARE

Don Bellini is a three-generation family business with over 70 years of experience in the foodservice industry. As a trusted manufacturer, marketer, and distributor of premium tableware, we are built on a foundation of rich heritage, deep industry knowledge, and a commitment to excellence. Our mission is to deliver innovative designs, competitive pricing, and prompt delivery—backed by a vastly experienced sales team dedicated to providing the best service and products to our customers, whether for hotels, restaurants, or home dining.

ABOUT DON BELLINI CUTLERY

Our cutlery collections reflect this same dedication to quality and craftsmanship. We offer a wide selection of high-grade stainless steel cutlery in 18/10, known for its durability, corrosion resistance, and lasting shine. Finishes range from the timeless appeal of classic shiny finish to our exclusive Demode finishing, available in luxurious Gold, warm Rose Gold, sleek Silver, and sophisticated Black. Each piece is thoughtfully designed to balance elegance with practicality, ensuring that every dining experience—from everyday meals to grand occasions—is elevated by tableware that is as beautiful as it is functional.

SURFACE TREATMENTS

Don Bellini offers a range of sophisticated surface treatments, each selected to enhance both the aesthetic and performance of our cutlery. From modern finishes to time-honored techniques, we provide solutions for creating distinctive table settings that stand out.

PVD COLOURED COATING

Our PVD (Physical Vapor Deposition) coating bonds color to stainless steel at the molecular level, delivering exceptional scratch resistance, corrosion protection, and long-lasting brilliance. Unlike traditional finishes, PVD is engineered to withstand the rigors of commercial hospitality environments while maintaining its vivid appearance. Available in a sophisticated palette including gold, rose gold, blue, rainbow, charcoal, and black. All PVD coatings are completely **non-toxic** and **non-allergenic**, making them fully suitable for use in the food sector.

MATTE FINISHING

Add a modern touch to classic cutlery with our matte finish. The smooth, non-reflective surface highlights the graceful curves of each piece, creating a look that is both understated and refined.

STONE WASHING

Our stone washing technique gives cutlery a distinctive antique appearance. Each piece undergoes a mechanical stone-washing process that creates a unique, weathered finish—no two pieces are exactly alike. This rustic style pairs beautifully with Don Bellini's natural porcelain collections.

DON BELLINI MATERIALS

Don Bellini cutlery is crafted with precision using carefully selected stainless steel grades. Each material is chosen for its specific characteristics, ensuring the right balance of performance, durability, and value across our collections.

18/10 STAINLESS STEEL (304)

The majority of our collections feature 18/10 stainless steel, an alloy composed of 18% chromium and 10% nickel. This premium grade offers exceptional corrosion resistance, protecting against rust and stains even through repeated commercial dishwashing. The high nickel content also enhances formability and produces a brilliant mirror-polished finish, resulting in cutlery that combines lasting beauty with superior durability.

201 STAINLESS STEEL

201 stainless steel is an austenitic grade containing approximately 17% chromium with a manganese-nickel composition. It offers good formability and corrosion resistance at an accessible price point.

420 HARDENED KNIFE STEEL

Across our collections, knife blades are crafted from 420 hardened stainless steel. This martensitic grade contains elevated carbon content, allowing it to achieve exceptional hardness through heat treatment. The result is blades that hold a sharp edge with reliability, delivering precise cutting performance that professionals trust.

410 STAINLESS STEEL (13/0)

410 stainless steel is a martensitic grade known for its strength and hardness. With approximately 12% chromium and a low nickel content, it offers excellent durability and can be hardened through heat treatment, making it well-suited for cutlery that requires enhanced structural integrity.

DB9004

The Leonardo cutlery collection boasts a smooth surface and mirror polish, ensuring a lasting shine. Its simple, modern design complements any table setting, elevating everyday meals into a fine dining experience. The streamlined handles offer a comfortable grip for both adults and older children, making it a versatile and stylish addition to your table.

POMPEI

18/10 Stainless Steel

DB9111 - DB9411

Pompei in matte silver and matte gold showcases sleek 18/10 stainless steel, offering both strength and effortless elegance. With round-headed spoons, delicately bladed knives, and slender handles, each piece combines unique design with practicality. The matte silver finish adds a modern, luxurious touch with enhanced rust and scratch-resistance, while the matte gold finish brings a warm, elegant accent to your table setting.

WASH GUIDE & CARE TIPS FOR STAINLESS STEEL CUTLERY

Stainless steel is highly resistant to staining and corrosion. However, even the finest alloys can be affected by corrosive foods, common salt, mineral salts (present in tap water), vinegar, harsh detergents, and bleaches if not removed by proper washing, rinsing, and drying procedures.

- Before first use, wash in lukewarm soapy water, rinse, and dry thoroughly with a soft towel.
- Wash cutlery immediately after use. Prolonged contact with food residues—especially acidic or salty substances—may cause pitting or staining.
- Use only pH-neutral detergents. Avoid chlorine-based bleaches, abrasive powders, and acidic cleaning agents.
- Ensure detergents have fully dissolved before immersing cutlery.
- When using a dishwasher, load cutlery without overlapping. A standing basket with knife blades facing downward is recommended to avoid scratches.
- Select a standard or gentle wash cycle. Remove cutlery promptly after the cycle completes.
- Hand dry immediately with a soft, clean cloth to prevent water spots and discoloration. Do not air dry.
- Do not soak cutlery for prolonged periods.
- Do not scour with abrasive pads or wire wool.
- Periodically clean with a reputable stainless steel cleaner to maintain lustre.

PVC COATED CUTLERY

For cutlery featuring PVC coatings, extra care is recommended. These elegant finishes benefit from gentle handling and hand washing to preserve their optimal appearance.

- Hand washing is recommended to preserve the coating.
- If using a dishwasher, use only pH-neutral detergents and ensure rinse temperature does not exceed 60°C.
- Remove immediately after the cycle completes and polish with a soft cotton cloth.
- Store separately from other cutlery to avoid scratching the coating.
